

**Amendments to the Specification**

Please replace the paragraph in the specification at page 3, lines 14-16 with the following rewritten version thereof:

$[\mathbf{R}^1]$   $\mathbf{R}'$  is an open-chain and/or cyclic alkyl, alkenyl, aryl, or alkylaryl, or arylalkyl group, with preferably 1 to 10 carbon atoms. With regard to this let reference be made to the additional explanations of the function of this group, which are found with the definition of the structure (II) described below.
